

This Comment is pertaining to AIR 1 Radio. This happens to be the only radio station that my children and I listen to. If you choose to cut the translator stations off the FM, then we will be forced to listen to the kind of music that has taken this nation down in flames. We, as well as hundreds of our close friends, listen to this station because of it's positive message and zero commercials. We help provide the funds that let this station operate and without it we would be disappointed in the FCC for allowing this kind of action to take place. Because of the translator service, we are able to listen to the same programming virtually anywhere in the nation. The same can not be said about other secular stations. We have the right to listen to the type of songs and message that we want and want our children to have the same opportunity. I know personally that my daughter has over 50 new friends listening to this station in just a few months of meeting them. You take this, and use exponential math. If each of these friends has only two friends start listening to this station, and they each have two. In one year the members listening will grow in a snowball effect. So I urge you to consider deeply what it is you would do if you put these translator stations off the air. Too many have been saved, I mean suicide attempts and people whose lives have been transformed. If you would just listen to this station yourselves, you would see the kind of wonderful effect it has on today's youth as well as those of us who grew up with Rock and Roll music in the 70's. It sends a positive message that reaches the inner core of a person's soul. PLEASE DO NOT TURN OUR RADIO STATION OFF!!!! I pray you do the right thing and may God bless you for all for leaving our station on the air waves.
